#### Description

Jean-François LARRIEU'S works are like exotic rhythms, an amalgamation of superimposed and repetitive forms, joyful and impressionable. He has created a distinctive language and architecture, choreographed in mosaics, multicolored and multicultural. Articulated within the landscape, and cityscape, these intricate renderings are stippled and overlaid with figures, trees, birds, creating a rich pictorial language, whose intimate vocabulary is influenced by his many travels abroad. Larrieu's implementation and usage of insistent calligraphic type imagery speaks to a transcendent era of artistry and faith. Through the acute lens, and skillful hand of this artist, LARRIEU transports us beyond the ordinary to such worlds both secreted and fantastical.
